

WATER WEAR 21'

Living in the Water

LIVE YOUR LIFE IN THE WATER

Definitely is where we live and what we work for every day - to spend more time in the water!!!
Our roots are based in Portugal, a blessed country and an amazing playground for all kinds of water sports!
It's our Passion, it's what we are living for!

IMPROVE YOUR SURFING

EXPLORE YOUR SPORT

More than a brand, Onda wants to be your partner. A partnership to deliver the best products so you can achieve maximum potential. A partnership based in knowledge, technology and innovation that follows you in every session, wave, jump or stroke.

WE ARE THE OCEAN

x **ONDA** x
WETSUITS

TESTED IN NAZARE SINCE 2013

Praia do Norte- ONDA Wetsuits
From Portugal to the world.
A connection with many years.

Praia do Norte is one of the most incredible waves in the world - versatile, powerful, beautiful, challenging - and the main test center of Onda Wetsuits products. It attracts thousands of watermen in different disciplines that are under the DNA of our brand. The relationship of ONDA with the wave of Praia do Norte and the city council of Nazaré is more than a normal protocol established between institutions and brands. It's a lifestyle.

A Praia do Norte é uma das mais incríveis ondas no mundo - versátil, poderosa, bela, desafiante - e o principal centro de testes dos produtos da Onda Wetsuits. Atrai milhares de watermen em diferentes disciplinas que estão sob o ADN da nossa marca. A relação da ONDA com a onda da Praia do Norte e o município da Nazaré é mais que um normal protocolo estabelecido entre instituições e marcas. É um estilo de vida.

COMMITMENT TO SUSTAINABILITY

VALUE-ADDED PRODUCTS: ONLY LAUNCH WHEN IT'S REALLY IMPORTANT

Launching a wetsuits collection every year has a big environmental impact because these can be products with a short life cycle. At ONDA we are committed to the innovation of our products, and we have our goals well defined in this aspect, so we will only release new wetsuits when we really believe that we have reached the level of innovation that we have set to.

ECO-FRIENDLY PRODUCTS: MATERIALS AND ECOLOGICAL PROCESSES

The lamination of our neoprene wetsuits uses a 100% aqueous and solvent free base glue. The rubber that we use are based in limestone and we are currently looking to introduce in our collection 100% natural rubber from certificated origin. In our lifestyle collection the vast majority of our products use organic cotton, sustainable raw materials or fabrics from recycled sources.

INITIATIVES OF OUR TEAM: SIMPLE ACTIONS WITH HUGE IMPACT

This is undoubtedly a big commitment for ONDA Wetsuits. Recycling is for example a very present reality in the mindset of our employees, who try to minimize our ecological footprint, towards a sustainable path.

SECOND LIFE FOR WETSUITS

BROKEN? FIX IT!

Nowadays when a product has problems, the idea is to buy a new one to replace it. But why? In the old days it was normal to repair things and give it a second chance. By doing so you are being more sustainable, you are enjoying your favourite wetsuit for longer, and of course, you will not have an unnecessary cost.

HOW IT WORKS?

- 1- Send the wetsuit to us;
- 2- We analyze and, if possible, proceed with the free repair. If it is not possible we will see what is the best deal we can offer you for an equivalent wetsuit;
- 3- Collect the repaired wetsuit.

The only cost that you'll have is the shipping.

NEOPRENE FOAM

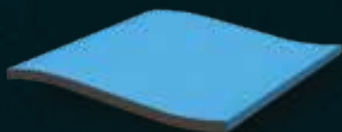

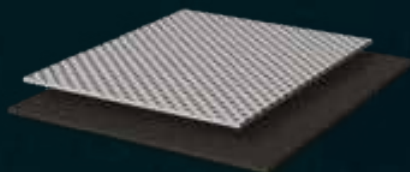

Ace Foam

Super stretchy and warmth provider.
Used in our top range collections:
- PRO, CUSTOM, SUP SERIES.

Durum Foam

Resistance & durability
Durum is a foam that grants a higher resistance in harsh usage conditions as surf schools and rentals.

Ventiprene

Ventiprene is an innovative neoprene foam that was engineered for activities in which you don't spend as much time inside water, like Stand Up Paddling. It's a great shield against cold and wind, doesn't let water get inside, but, the heat and moisture escape from inside the garments as water vapor.

Aqua-based Lamination Glue

Since 2018, we use Aqua Based Glue in the lamination process of the wetsuits. A more environmentally friendly solution presented in all the PRO SERIES lines.

Solvent Free

No more harmful solvent chemicals in your neoprene products.

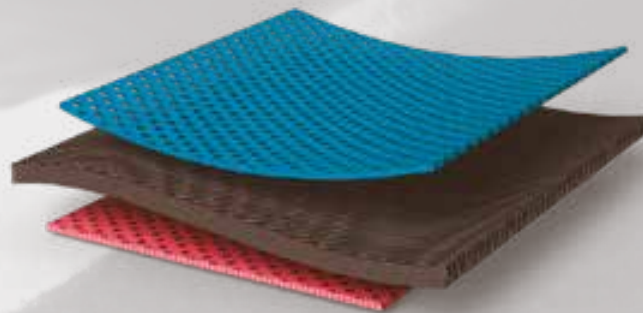

Eco friendly

Solvent

ACE + FOAM

THE ULTIMATE INNOVATION CONTINUES IN 2021!

20% lighter;
20% warmer;
20% stretchier.

Technologies Glossary

Smooth collar skin
No abrasion

The inside of ONDA's collars is made of a very soft and stretchy material, that will keep your neck free of abrasion marks. Also does a great job protecting you from the colder winds in the neck area.

Ignis Tech Plus
- Faster drying,
enhanced warmth.

Ignis Tech Plus is the fastest drying material in the market! Because it flushes out the water trapped inside the wetsuit so fast, you'll have a superior accumulation of heat. It also works as an active barrier for the windy days.

AES TECH – Comfort & warmth

All PRO SERIES models have the inside lining made of AES TECH material. It grants a more functional flushing of the water that gets inside, potentiating a bigger retention of body heat. This material is also smoother, so it will avoid abrasion on the skin.

Astrozip System
- Smaller Zipper:
Improved Flexibility

The Astrozip System features a smaller horizontal chest zipper and an innovative entry system with a chest batwing flap. It's very easy to get inside, and very flexible.

Chest Zipper

The most common zipper in our collection that can be found in our Shield and Zflex line. The inverted zipper in Onda Wetsuits will grant additional comfort and resistance.

Zipfree System - Surf

Free your surf, become more flexible! Now with an easier entrance build.

Liquid Seal -
Warmth is a key

Thermal capacity is our priority. Besides making the wetsuit more water proof, and therefore warmer, it also improves the strength of the stitching, making it more resistant.

FS Tape - Extra Warmth &

Innovative interior seal tape, super stretchy and thin (0.5mm) made of AF material, that grants superior elasticity to the seams as well as reinforced water tightness. It also has a very soft touch, reducing abrasion on the sensitive areas of the body.

Fused Cut Edges

Top end finish that grants more longevity to your wetsuits.

Double Flap Closure

Internal entry system, less restrictive and more flexible. It closes the inside panel tighter to the neck. Water will not get inside so easily. Grants a superior resistance to an area of the wetsuit that is subjected to a lot of tear.

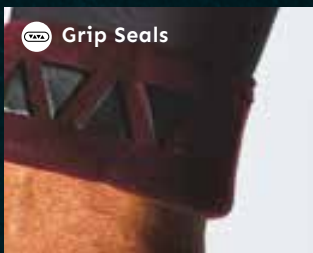

GBS - Glued and Blind Stitched

Stitching in which the two panels are aligned side by side, glued and then stitched. The needle never gets to pierce the neoprene from one side to the other: You'll get a very water tight wetsuit with this process, and more resistant seams.

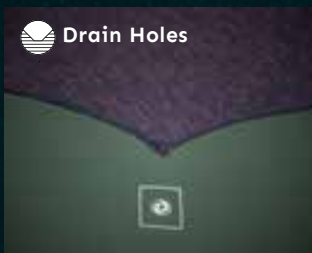

Flatlock

Stitching in which the two panels are overlaid and then zig-zag stitched. This stitching is more common on summer wetsuits.

Grip Seals

Improves the water tightness of the extremities (ankles and cuffs).

Drain Holes

Specially placed holes to drain the water that might get accumulated inside some areas of the wetsuit.

KPads - Bullet Proof?
Yes

When surfing, one of the most buffeted areas is the knees, so, our KPADS are made of a super resistant material on the outside (KEVLAR) and with a more stiff and resistant foam, offering extra protection on impacts.

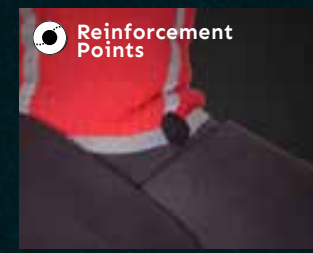

YKK Zipper - Never Break

The zippers used on our Wetsuits are YKK, the best on the market, with a superior resistance to the natural corrosion made by the ocean water.

Key Pocket

Special pocket to stash your key while you're on the water.

Reinforcement Points

Small circular dots made of a resistant material that are applied to grant extra strength on specific seams, which may be more exposed to pressure than others.

Description

Improved through the years, the chest zipper model is one of the most searched entrances by surfers nowadays. With the new Dynamic Fit concept, the wetsuits cutlines and panels work closely with the human body mechanics and motions, making the wetsuit more and more movement friendly and stretchier. The IGNIS TECH PLUS lining is strategically placed on the chest and / our back panels of ZFLEX4. This will grant extra warmth and comfort on the colder or windy surf sessions.

Descrição

Melhorado ao longo dos anos, o modelo com fecho no peito é um dos mais procurados pelos surfistas hoje em dia. Com o novo conceito de Dynamic Fit, as linhas de corte e os painéis do wetsuit trabalham numa relação próxima com as mecânicas e movimentos do corpo humano, tornando o wetsuit mais elástico e mais "amigo" dos movimentos. O IGNIS TECH PLUS foi estrategicamente colocado no peito e / ou costa do ZFLEX4. Isto garante aquecimento e conforto extra nos sessões de surf mais frias e ventosas.

Description

This model was designed to bring you the maximum flexibility for your performance, so you can determine what you want to do without being restricted by the wetsuit. Because it doesn't feature a zipper, this model is very stretchy and lightweight. These, combined with the Dynamic Fit make it one of the best options for any of the surfing seasons. On the FREEDOM 4/3 V1 model was included IGNIS TECH PLUS lining on the chest area, so you can surf on colder sessions before having to put on a 5mm wetsuit.

Descrição

Este modelo foi desenhado para te oferecer o máximo de flexibilidade à tua performance, de modo a que possas determinar o que queres fazer sem seres restringido pelo teu wetsuit. Como não inclui zipper, este modelo é muito elástico e leve. Estas características combinadas com a abordagem Dynamic Fit fazem com que seja uma das melhores opções para todo o ano. No modelo FREEDOM 4/3 V1 foi incluído o material IGNIS TECH PLUS na zona interior do peito, para que consigas aguentar mais tempo nas sessões frias de inverno antes de precisares de vestir um wetsuit de 5mm.

Description

Featuring IGNIS TECH lining on 80% of the interior combined with the AES TECH base, this wetsuit is the ultimate blast and the best choice for facing the colder winter/wind days. It flushes the water from the inside faster than ever, granting the maximum comfort and warmth! The 5.3mm model features an integrated Hood to protect you in the harshest conditions. The 3mm model was designed to surf in places where the cold water isn't so hard, but where it's important to have a thinner wetsuit with extra mobility to perform, keeping the same warm characteristics.

Descrição

Com IGNIS TECH em 80% do interior combinado com a base de AES TECH, este modelo é o último grito e a melhor escolha para enfrentar os dias frios e ventosos do inverno. Escoa a água do interior do fato mais rápido do que nunca, garantindo o máximo conforto e aquecimento! O modelo 5.3mm apresentam um gorro integrado para te proteger nas condições mais adversas. O modelo de 3mm foi desenhado para surfar em locais onde a água fria não é tão exigente, mas onde é importante ter um wetsuit mais fino e com elasticidade extra, mantendo as mesmas características de aquecimento.

Wetsuits Woman size chart

Measurement point	S	MS	M	ML	L
Height (cm)	160 - 165	163 - 168	166 - 172	166 - 172	171 - 176
Chest (cm)	80 - 86	83 - 89	85 - 91	89 - 95	91 - 97
Waist (cm)	64	67	69	73	78

Wetsuits Kid size chart

Measurement point	8	6	10	12	14	16
Height (cm)	121 - 132	132 - 140	140 - 148	148 - 156	156 - 164	164 - 168
Chest (cm)	65	69	72	76	80	84
Waist (cm)	52	55	58	61	64	67

HOW TO MEASURE

1 HEIGHT

Measure your height, from the floor to the top edge.
You should measure barefoot.

2 CHEST

Measure the totality around the widest part of your chest.

3 WAIST

Measure around your natural waist.

WARRANTY

ONDA Wetsuits likes to take care of its customers with the higher standards always in mind!

Let us introduce you to some general guidelines:

All PRO and SUP Series wetsuits have 2 year warranty from the original date of purchase, on workmanship and materials. We will by our option repair or replace these wetsuits if considered defective under normal use and proper care.

The accessories have 6 months warranty (boots, gloves, hoods, shorts, lycras)

Please be aware that our warranty will not cover the following issues:

- Damage caused by anything other than defects in materials or workmanship.
- Use for commercial, rental, teaching, instructional programs or activities is not cover by our warranty.
- Damage caused by extended or excessive exposure to sunlight, improper handling or storage, or failure to follow instruction provided with this product.
- This product when classified as being 2nd hand or it is being sold as a 2nd (it is being sold as a product with existing defects).

- Normal wear and tear, including scratches and fading.
 - Wetsuits repaired by other repair service.
- Also, don't forget to always keep your proof of purchase in a safe place!
